Habsburg: IT'S HUNGARY!  
Ottoman: NO! IT'S HUNGARY!

MR. Habsburg won the crab!

# The History of Prussaville (a.k.a. The History of Prussia)

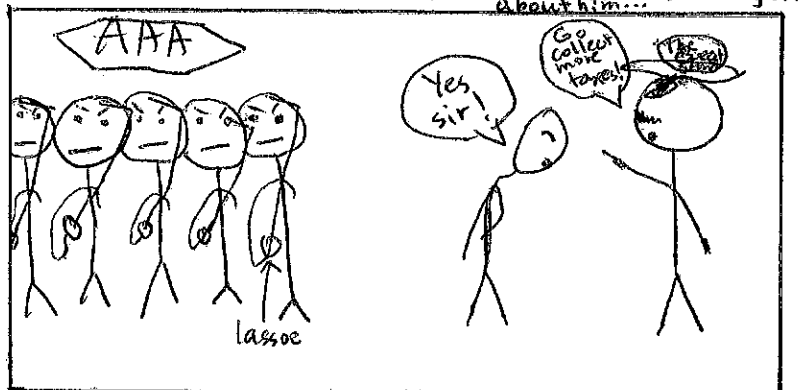

In the wild west town of Prussaville, the sheriff slept all day. He didn't try to keep order in the town because he knew the shopkeepers and ranchers held all the power. So the sheriff, from the lineage of the Hozollens, would just take a nap.

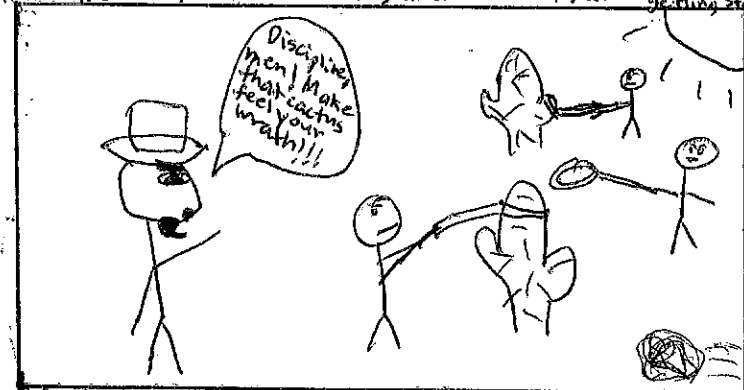

Then, there was an alien invasion!!! The sheriff finally took control after the attack, and he sprung into action. His name? FEDERICO WILL... THE GREAT SHERIFF. He saved the town from complete destruction after the aliens were gone. But there was something evil about him...

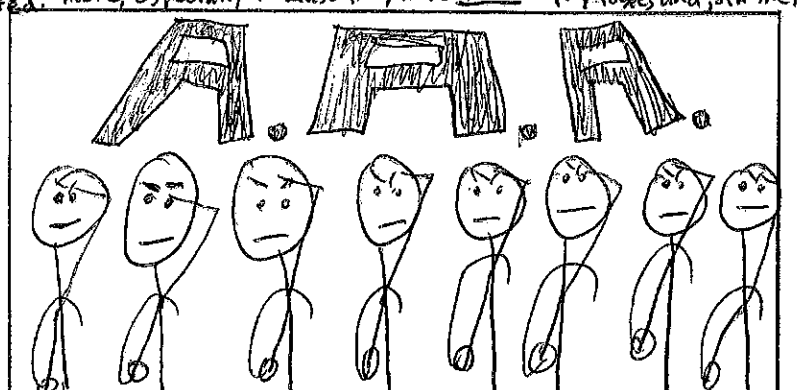

Federico Will took control of the town's taxes first. The shopkeepers and ranchers didn't want that to happen since it subtracted from their power, but the Great Sheriff won eventually because he confirmed the rights of the shopkeepers and ranchers to force the public to work for them. Therefore, the Great Sheriff gained control of taxation, and he was just more, especially because they were forced to pay taxes, and join the AAA.

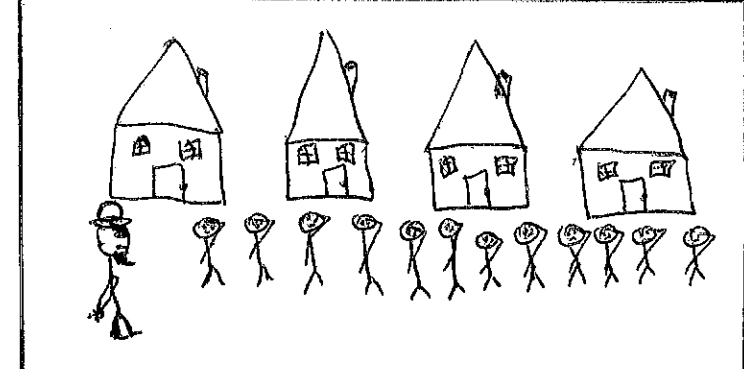

The Great Sheriff taxed the people without their consent, established the AAA (army against aliens) and set up a tight system in which he hired officers to carry out tasks such as bank tax collection for him. These reforms made the people hate the Great Sheriff even more, especially because they were forced to pay taxes, and join the AAA.

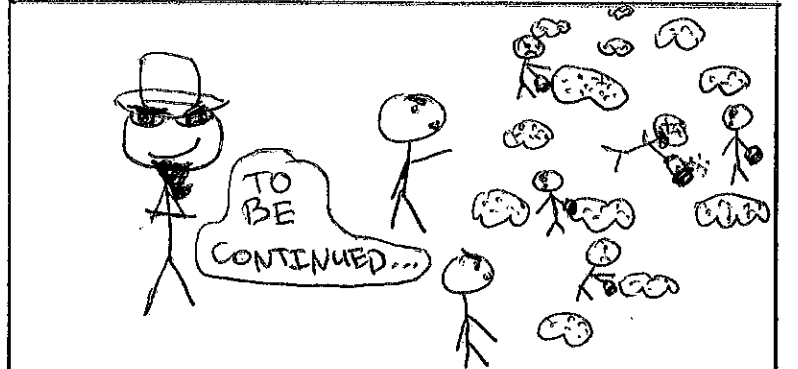

Federico Will J, the Great Sheriff's grandson, eventually took control of the town, he forced even more people to join the AAA, including some ranchers and shopkeepers. He spent endless hours training them with their lassos, and revolvers. This took its toll on the society though, and it made Prussaville a very strict place to be.

Nonetheless, Prussaville now had the best army around. They went from being destroyed by aliens to a strong militaristic union, it was all thanks to the sheriffs... especially Federico Will J who created the greatest army anywhere for miles around. But what did the people think?

The people disliked their new disciplined lifestyle, and the ranchers and shopkeepers were upset as well. Federico Will J kept them quiet though by recruiting them into the army. Prussaville, because of its highly disciplined society, became known as a secondary "sparta".

Although the Hozollen sheriffs did save Prussaville from destruction, they also made the people very angry and unhappy with their new lifestyle. So were the Great Sheriff and his grandson good guys or bad guys? That is a matter of perspective, but according to the people of Prussaville, they were definitely the worst sheriffs in the history of the city.
